

Nanoscale BioPhotonics

Workshop 2014

**ASCEPT-MPGPCR
Satellite meeting**

Friday 12th December 2014
8.30 am – 1.00 pm

Monash Institute of Pharmaceutical
Sciences, 381 Royal Parade, Parkville,
Melbourne VIC, 3052
\$25 (morning tea included)

This half-day workshop will introduce the interdisciplinary approaches adopted by physicists, chemists and biologists to address fundamental and novel biological questions. Key cutting-edge technologies exclusive to the ARC Centre of Excellence for Nanoscale BioPhotonics (CNBP) will be described along with examples of current and potential applications. This workshop is an excellent forum to discuss the impact of these cutting-edge technologies on your research with CNBP researchers, who can then facilitate collaborations.

Confirmed speakers: Prof Mark Hutchinson (CNBP Director, University of Adelaide), Prof Stephen Hill (University of Nottingham), A/Prof Kevin Pflieger (University of Western Australia), A/Prof Andrew Greentree (RMIT), Prof Nicolle Packer (Macquarie University), A/Prof Heike Ebendorff (University of Adelaide), Dr Alexandre Francois, (University of Adelaide).

Limited places! Please register at: <http://goo.gl/9GIwN3>
