

## Connect with fellow attendees through the meeting hub

The meeting hub is an attendee to attendee networking hub where you can search for and connect with other attendees. Once your connection request has been accepted, you can send messages, have video chats, schedule a meeting and exchange contact details. It is a great way to look for your colleagues or to make some new connections.

The meeting hub will be open from Tuesday 17 November to Friday 27 November, so you can schedule one-on-one meetings before, during or after the main meeting program. We encourage you to stop in at the meeting hub regularly to see if you have any new connection requests.

Simply scroll through the list of attendees, search for a specific person in the filter box or using the Advanced Search, look for attendees with the same areas of interest. If you filled out a meeting hub profile you can search based upon these questions.

In the middle of your screen you will see all connections you have requested and those who you have connected with at the top. Now you can chat, hold instant meetings or schedule a meeting for later in the day.

**Please note: Anyone who selected 'I do not want to be visible in the meeting hub' during the registration process, will not appear in this list.**
