

Personalise your timeline

We hope you have had a chance to visit the timeline where you will see a list of all meeting sessions. As there are many concurrent sessions, it's a good idea to create your own personal timeline so that you only see the sessions and activities that interest you.

To **'favourite'** a session, simply click on the **star** next to the session name. At anytime, click on the star next to the filter box and your timeline will change to only show your selected sessions and functions.

Please note: If you have starred oral sessions and are working from your personalised timeline and then visit the poster gallery, posters will also only be visible if you have starred them. To view all posters, ensure you have unselected the favourite star on the main timeline.
